

## Project Status Report no 4

### Project Information:

- **Project Name:** NBP Crasher
- **Project Manager:** Przemysław Kowalski
- **Report Date:** 18.01.2025
- **Project Duration:** 08.12.2024 – 31.01.2025

### Testing Environment:

- **Operating System:** Fedora Linux (41)

### Tests:

- **Scope:** functional and manual testing.
- **Time:** 2h

### Issues and Challenges:

- During the testing phase ([#38](#)) 2 issues were found:
  - Deployment to test environment (issue [#57](#)),
  - CORS configuration (issue [#61](#))
  - Date From equals Date To (issue [#65](#))
  - Custom Date is not working (issue [#63](#))
  - Rate Limit (issue [#73](#))
  - Currencies Validation Error (issue [#74](#))
  - Block Calculations For Same Currency (issue [#72](#))
  - Displaying the dominant (issue [#56](#))

### Current Status:

- **Milestones Progress:** Deployment & manual tests are still in progress,
- **Current Tasks Overview:** Preparing for manual retests and fixing all issues. Waiting to fix test environment deployment before the production.
- **Project Completion Percentage:** 90% (includes frontend, backend, test environment deployment attempt, automated & manual testing phases).

### Upcoming Milestones and Tasks:

- Manual retests ([#38](#)),
- Deployment of the application to the production.

### Recommendations:

- **Prioritize Critical Issue Resolution:** Address all identified issues (e.g., deployment to the test environment, CORS configuration, custom date functionality, etc.) before proceeding with the production deployment. Ensure all blockers are resolved to prevent post-deployment complications.
- Ensure all team members are prepared for the production deployment phase.
